

## **CLAIMS:**

**I:** I claim the device, when properly housed, can detect, photograph and display to the driver of a vehicle, such as a automobile, any other vehicle that will collide with the driver, or take a still photo of the vehicle when the IR Ranger has detected motion in a certain range or distance from the front or rear of the vehicle. In the event of a crash, or hit and run, it can provide police with time and date from the onboard clock of the Prism, a photograph of the striking vehicle and possibly the weather conditions of the crash and the direction via the compass of the victims vehicle was in before the crash.

**II:** I claim the device can be used, with the rechargeable battery, as a personal documentation device in hazardous or other conditions, where smoke or other material may obscure an object from sight (dangerous or not) that may be too close to the user.

**III:** I claim that the device can be used to determine the location of the user of the device, with the aid of the compass, give the user a bearing, the time, and the means to photograph anything around the user, in case the user is lost, disoriented, sightseeing, etc.

**IV:** I claim that the device can take pictures at any interval, with time and date stamp to record movement via the IR Ranger, as a security device in restricted or sensitive areas, such as an office, a screening room, etc.

Attached is the Fee, Oath and other forms required by the Patents Office.
